PROPOSED PROTOCOL | No new model results
1 LOCK INPUTS
124 rare dev images
22 legacy rare queries
Hash / duplicate screen
Verified patient links
Eligibility + exclusions
2 FREEZE ENCODERS
RETFound / DINOv2
MIRAGE (OCT only)
Keras Inception reference
Native transforms; FP32
Fresh caches + identities
3A FIVE-WAY K-SHOT
Paired, nested real supports
5-fold dev: K = 1, 2, 4, 8
100 prototype draws; fixed probe
3B NINE-WAY AUDIT
1,000 common supports/class
+ all eligible rare fitting images
One real-only prototype head
4A REPORT
Dev-only nominee
Legacy / eligible
external queries
4B AUDIT
NORMAL FRR
Kermany / OCTID
/ OCTDL by source
External inventories: terms, labels, dependence;
freeze query IDs before inference.
No outcome-driven changes. Similarity groups are not patient IDs. All models remain visible.
